

ATELERIX
SAVIOR OF CELLS

No, we are not a courier...!

THE FUTURE OF BIOSAMPLE LOGISTICS

Darlings, Prepare to Have Your Scientific Spines Tingled!

Crafting shelf-stable science inspired by hedgehogs, Atelerix is the answer to the cryopreservation headache. With a gel that's not just cool but doesn't need to be cold, they're setting cells, tissues, and viruses free from the icy grip of traditional storage and shipping methods. Welcome to the future of bioscience, where the storage is easy, and the cells are always fresh.

WHY ROLL WITH ATELERIX?

SAMPLE VITALITY

"Our cells are livelier than a hedgehog at a worm buffet!"
Keep your precious specimens in tip-top shape during storage and transport. Our hydrogel embrace ensures they're as perky as a hedgehog's quills!

LOGISTICAL WIZARDRY

"Shipping samples is now anxiety-free"
Wave goodbye to dry ice dramas and liquid nitrogen nightmares. Room temperature transit is the new black in biopreservation fashion.

PENNY-PINCHING PERFECTION

"Save more quills... er, dollars!"
Ditch those energy-guzzling freezers and watch your budget breathe a sigh of relief. More funds for tea and biscuits (or perhaps more experiments, if you must).

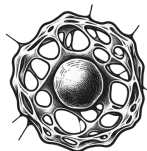

ATELERIX

OUR PRICKLY PORTFOLIO:

See our data

CYTOSTOR™

Suspended and adherent cells and viruses

LEUKOSTOR™

Leukapheresis material

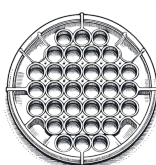

TISSUEREADY™ PLUS

primary tissue and microtissues

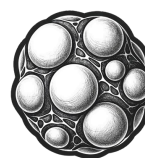

BLOODREADY™

Whole blood

WELLREADY™

Cells, organoids and microtissues in multi-well plates

BEADREADY™

Suspended and adherent cells

KEY PERKS (OR SHOULD WE SAY, 'QUILLS'?)

NO COLD CHAIN

Store cells at room temperature longer than a hedgehog's winter nap.

SHIPPING SIMPLICITY

Collaborate with ease - our samples travel better than a hedgehog on a magic carpet.

GREEN GOODNESS

Shrink your carbon footprint faster than a hedgehog retracting its spines.
